

testing::Test

```
classDiagram
    class testingTest["testing::Test"]
    class ExpressionParserTest
    ExpressionParserTest --|> testingTest
```

The diagram illustrates a class hierarchy. At the top is the 'testing::Test' class, represented by a white box with a black border, divided into three horizontal sections. The top section contains the text 'testing::Test', while the two bottom sections are empty. Below this is the 'ExpressionParserTest' class, represented by a gray box with a black border, divided into three horizontal sections. The top section contains the text 'ExpressionParserTest', the middle section is empty, and the bottom section contains two lines of text: '# SetUp()' and '# TearDown()'. A blue arrow points from the top of the 'ExpressionParserTest' box to the bottom of the 'testing::Test' box, indicating inheritance.

ExpressionParserTest

SetUp()

TearDown()
